

# Is The SaltFacial Right For You?

The SaltFacial is a completely non-invasive skin renewal therapy that resurfaces your skin. It works by combining natural exfoliation based on sea salt with cavitation ultrasound and LED light therapy. NASA has been using LED therapy for years for healing, and mainstream medicine is finally starting to get on board, using this technology to kill bacteria while increasing circulation and stimulating collagen and elastin production.

The SaltFacial harnesses the healing powers of salt crystals, using phototherapy that works like photosynthesis does for plants to supercharge your mitochondria and help your cells absorb nutrients more readily. You'll see visible results after only one treatment.

## THREE STEPS OF THE SALTFACIAL

The SaltFacial is applied in three steps for a relaxing experience with beautiful results. This completely pain-free process works for all skin types and requires no downtime.

1. Restore
2. Replenish
3. Rejuvenate

## THE SALTFACIAL SEA SALT BENEFITS

Sea salt is all natural and works well with any skin type. It speeds up the healing process, making it a good match for pairing with other treatments. Organic sea salt has natural anti-inflammatory properties and works to provide relief for itchy or dry skin. It offers deep cleansing while opening up your pores.

Sea salt also reduces the oiliness in your skin, while at the same time, balancing your body's oil production, creating an overall more even skin tone. It can improve your circulation, hydrating your tissue. It also works as a natural antiseptic, killing bacteria responsible for unpleasant acne and breakouts. Sea salt can also serious ongoing skin conditions such as dermatitis, psoriasis, and eczema and reduces the appearance of stretch marks.

## WHAT TO EXPECT WITH THE SALTFACIAL

Almost anyone is a great candidate for the SaltFacial. It works for anyone, regardless of your skin tone or type. Whether you have damage from the sun, stretch marks, acne, or other skin issues, the SaltFacial can help renew and refresh your skin.

The SaltFacial is an alternative treatment that contains no harsh chemicals and is completely non-invasive, meaning you can expect no unwanted side effects. The SaltFacial immediately improves your skin tone, evening out your skin's texture and color. Expect your skin to more readily absorb vitamins, nutrients, and topical skin products after your SaltFacial.

Frequently asked Questions:

### **What Is A SaltFacial?**

**The [SaltFacial](#) is a revolutionary three-step treatment that uses all-natural sea salt exfoliation, aesthetic ultrasound and LED phototherapy to restore, replenish and rejuvenate the skin.**

### **How Safe Is The SaltFacial?**

The SaltFacial is safe for all skin types and tones with little to no downtime.

### **Are There Any Side Effects?**

You may experience dry or flaking skin, redness or pinkness and possible stinging around sensitive areas; near the eyes for example. These side effects should lessen after 24-48 hours.

### **How Many Sessions Should I Have?**

We recommend at least four SaltFacial sessions for the best results. The SaltFacial, as with all skincare services, can and should be repeated monthly for continued skin maintenance and optimal results.

### **How Much Does A SaltFacial Cost?**

The SaltFacial is \$350 for one treatment. We also offer packages.

### **How Long Does It Take To See Results?**

You may notice visible results after your first treatment. Patients have noticed improvement in the skin's tone, texture and color after their first SaltFacial.

### **Is There Any Pain?**

The SaltFacial is typically a pain-free treatment. Some patients have expressed stinging in areas where the skin is thinner or more sensitive, like on the forehead or near the eyes.

### **Will It Immediately Hydrate My Skin?**

Aesthetic ultrasound drives powerful antioxidants deep into skin tissue to be absorbed at a 30 percent higher level than simply applying products topically. This helps stimulate collagen and hydrate the skin from the inside out to reveal healthier and younger looking skin.

### **Who Is A Good Candidate?**

Anyone is a good candidate for The SaltFacial. It's safe on all skin types and tones and can be used to treat multiple skin concerns including acne, stretch marks, scarring, sun damage and more.
